# Psychology Services

**Our psychologists conduct standardised assessments and use evidence-based practices such as Cognitive Behavioural Therapy and Acceptance and Commitment Therapy to guide intervention.**

These approaches will complement other therapies your child may be receiving. We work collaboratively with the child, family, school, and other professionals. Individualised assessment and planning is delivered using positive behaviour strategies and support to improve outcomes of children and young people with behaviours that interfere with daily life and learning.

We provide parent education and support to help manage and cope with your child's challenging behaviours as well as evidence-based strategies to use at home. For children, we can help with management of anxiety and anger, emotion regulation and social skill development and conduct assessment for cognitive and learning difficulties.

Our psychology services may be claimable through Medicare or NDIS. Please see our website for a detailed list of fees.

If you are interested in finding out more about our psychology services or if you have any questions, please get in touch.
